INTERVID COMPANY PROFILE

South Africa's leading provider of AI-enhanced security solutions and intelligent infrastructure systems, serving major institutions across Sub-Saharan Africa for over 26 years.

WELCOME TO

Intervid-Africa

With over 26 years of experience serving major institutions across Sub-Saharan Africa, Intervid designs tailored solutions that reduce risk, ensure compliance, and protect people and assets.

Intervid Africa operates from 3 regional head offices based throughout South Africa.

In today's complex business environment, organisations face a growing range of internal challenges, such as unauthorised access, employee theft, compliance violations, and external threats, including break-ins, vandalism, cyber risks, and industrial espionage.

Relying on disconnected security systems only deepens these vulnerabilities, creates oversight gaps, slows response times, and drives up costs.

Our integrated AI enhanced security and intelligent infrastructure solutions seamlessly combine CCTV surveillance, access control, fire detection, and building management systems into a powerful unified platform, enhancing visibility, improving response capabilities, and driving operational efficiency.

Secure your business with a smarter, unified and more effective security strategy designed to keep you one step ahead of emerging risks.

ABOUT

Intervid-Africa

Discover the Future of Integrated Security

Our Vision

To be the leading provider of AI-enabled security and intelligent infrastructure solutions across Sub-Saharan Africa, helping organisations create safer, more efficient, and well-managed environments.

- Continuous investment in cutting-edge technology
- Industry expertise to set new benchmarks for reliable, scalable security solutions
- Strategic focus on future-ready systems that adapt to evolving security challenges
- Dedicated to empowering businesses with complete control over their environments, regardless of operational complexity
- Commitment to delivering solutions that build lasting confidence in our clients' security infrastructure

Our Mission

To provide seamlessly AI-enabled security solutions that help businesses mitigate risk, improve operational control, and ensure compliance.

We achieve this by solving industry-specific security challenges customised to each client's unique environment.

- Implementation of best-in-class technology in CCTV, access control and building management
- Expert project management ensuring smooth implementation with minimal disruption
- Comprehensive service support through maintenance agreements and scalable solutions
- Strategic partnerships with global technology leaders to stay ahead of emerging threats

INTERVID

Solutions & Services

From advanced surveillance to intelligent building management, we deliver integrated solutions that protect assets, streamline operations, and enhance security. Our comprehensive portfolio combines industry-leading technology with expert implementation and ongoing support for organisations across diverse industries.

CCTV Solutions

Advanced digital surveillance systems ranging from single-site installations to enterprise-wide networks.

Our CCTV solutions include AI-powered analytics, remote monitoring capabilities, and seamless integration with other security systems.

Access Control

Sophisticated access management solutions, ranging from simple card systems to advanced biometric technology.

Our solutions control and monitor facility access, integrate with HR systems and provide detailed movement analytics.

Time & Attendance

Automated workforce management solutions that optimise productivity and ensure compliance.

Features include biometric verification, shift management, leave tracking, and comprehensive reporting.

Building Management Systems (BMS)

Intelligent infrastructure control combining security, HVAC, lighting, and fire systems.

Our BMS solutions reduce operational costs while improving facility efficiency and safety through centralised management.

OUR

Intelligent Solutions

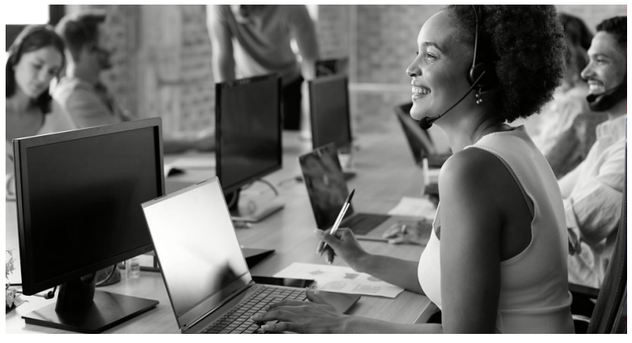

Intelligent technology transforms security data into actionable insights, enabling proactive threat prevention and operational optimisation. Our smart solutions combine AI-powered analytics with advanced detection systems to enhance protection and drive business performance.

AI-Powered Security Solutions

Advanced artificial intelligence that revolutionises surveillance and protection.

Our solutions include behavioural analysis, intrusion detection, license plate recognition, and real-time anomaly alerts for proactive threat prevention and health and safety compliance.

AI-Based Productivity Solutions

Data-driven systems that optimise workforce efficiency and resource utilisation.

Our intelligent analytics provide insights for improved productivity, space and inventory management, quality control, and compliance monitoring.

Access Control Solutions

Cutting-edge technology that secures your premises with precision and intelligence.

Our access control solutions incorporate biometric and facial recognition systems for robust identity verification, seamlessly integrated with large space intelligence through CCTV to monitor and manage expansive areas.

OUR

Industry-leading Technology Partners

We've established strategic partnerships with the world's leading security manufacturers and technology providers. These collaborations enable us to deliver cutting-edge solutions while ensuring reliability, scalability, and ongoing innovation for our clients.

IDEMIA	TURNSTAR RELIABLE ★ DURABLE ★ GUARANTEED	HIKVISION	Synerion
Digital security, identification and access control technologies	Manufacturer of turnstiles, revolving doors, barriers, and more	CCTV and NVR manufacturer	Advanced human capital management (HCM) solutions
dahua TECHNOLOGY	AXIS COMMUNICATIONS	CATHEXIS Beyond Surveillance	impro
Cameras and CCTV solutions	Supplier of networked video	CCTV security surveillance technology	Access control & product identification systems
BOSCH	ZKTeco	iqtech technology solutions	AVIGILON
Global supplier of technology and services	Global supplier of access control, time & attendance services	International supplier of time & attendance solutions	CCTV and NVR manufacturer

We work with many additional world-class brands.

BESPOKE

Security Solutions for Every Sector

Our integrated security solutions are trusted across diverse sectors, from critical infrastructure to commercial enterprises. We understand each industry's unique challenges and compliance requirements, delivering tailored solutions that address specific operational challenges.

Critical Infrastructure

Protecting vital facilities, including power plants, water utilities, telecommunications networks, and data centres.

Our high-security solutions ensure continuous operations and regulatory compliance for these essential services.

Government & Public Safety

Specialised security systems for government facilities, embassies, border control points, and emergency services.

We deliver robust solutions that meet stringent security protocols while enabling efficient operations.

Industrial & Manufacturing

Comprehensive protection for factories, warehouses, processing plants, and distribution centres.

Our integrated solutions safeguard assets, monitor operations, and optimise facility management across the industrial sector.

Commercial & Retail

Tailored security for retail chains, shopping centres, office complexes, and financial institutions.

We help prevent losses, protect staff and customers, and improve operational efficiency through intelligent integration.

Transportation & Logistics

Advanced security for airports, seaports, railways, and logistics hubs.

Our solutions protect cargo, monitor vehicle fleets, and secure facilities through integrated surveillance and access control.

Education & Healthcare

Creating safe environments for schools, universities, hospitals, and medical facilities.

Our solutions protect people and sensitive areas while ensuring smooth operations and visitor management.

INTERVID

Implementation & Support Services

From initial consultation to ongoing support, we ensure your security solutions' successful implementation and maintenance through comprehensive professional services.

Rental Finance

Flexible rental finance options to empower your business.

We offer payment plans with terms of 12 to 36 months and credit options that ease upfront costs.

Export and Sourcing

Efficient export and sourcing services that streamline procurement and global distribution.

Our service ensures timely delivery of cutting-edge security solutions to meet diverse market demands.

Service Level Agreements

Robust service level agreements with clear performance metrics and immediate escalation protocols.

Our contracts ensure rapid response and ongoing support for your integrated security systems.

Project Management

Expert planning and execution of multi-disciplinary security deployments.

Our three-tiered project management approach ensures successful solution delivery, from planning to training and handover.

System Maintenance

Comprehensive maintenance solutions covering CCTV, Access Control, and Building Management Systems.

We deliver preventative and break-fix services to support both new and legacy equipment.

System Integration

Seamless integration of security and building management systems into a single control platform.

Our solution enables efficient oversight of multiple systems through a unified, intuitive interface.

OUR

Certifications & Compliance

Intervid maintains key industry certifications that ensure professional service delivery and regulatory compliance. As a registered security solutions provider, we operate under strict industry guidelines while contributing to South Africa's economic transformation goals.

B-BBEE Level 3 Contributor

Our Level 3 B-BBEE certification demonstrates our active commitment to economic transformation in South Africa. This rating reflects our ongoing investment in skills development, enterprise development, and socio-economic advancement within our industry.

OUR

Featured Projects

Our track record spans thousands of successful implementations across multiple industries.

From large-scale enterprise deployments to specialised security solutions, each project demonstrates our commitment to excellence in system design, implementation, and ongoing support.

Explore our featured projects to see how we've helped organisations transform their security operations.

01

Access Control and Integration.

Client: PUTCO
Company name: PUTCO (PTY) Ltd.
Industry: Transport

Challenge: PUTCO needed to seamlessly integrate their payroll system with existing operations to streamline processes and meet specific business requirements.

Solution: We developed custom scripts that enabled full utilisation of the payroll system, achieving a flawless integration that aligned perfectly with the client's operational needs.

02

Access Control - PL Fleet.

Client: Toyota
Company name: Toyota South Africa (Pty) Ltd.
Industry: Motor Industry

Challenge: The client had a challenge where they had no control over access to their PL Fleet.

Solution: We came up with a solution to control access to the section of the business. We installed boom gates with readers and software that manage access to the section through intelligent systems

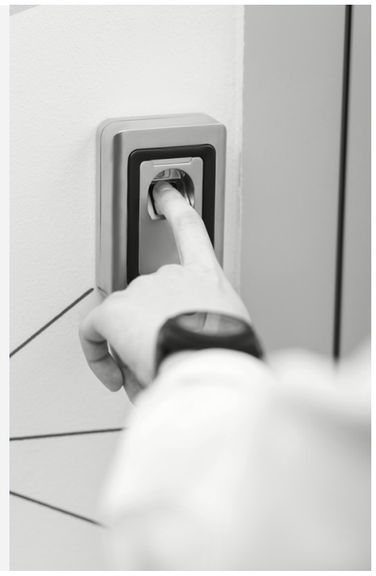

03

Access Control Solution.

Client: Exxaro
Company name: Exxaro Resources Ltd.
Industry: Mining Industry

Challenge: The client experienced recurring issues with access card management, as staff and contractors often lost their cards, leading to security breaches and access delays.

Solution: We replaced the traditional access cards with a biometric system. This cost-effective solution eliminates the risk of lost cards and streamlines secure access for all personnel.

04

CCTV Installation (Jetson)

Client: Hungry Lion
Company name: Hungry Lion Fast Foods (Pty) Ltd.
Industry: Restaurant Industry

Challenge: The client required a custom-made CCTV cloud storage solution tailored to their operational needs.

Solution: We configured the Jetson devices to support the client's own cloud-based storage programs, ensuring seamless integration and reliable performance.

What Our Clients Say

First Car Rental

Christo Saayman - Regional Operations Manager

I wish to confirm that CMH Car hire t/a First car Rental has been utilizing the services of Intervid since August 2013.

When we were procuring a new CCTV system for our Pomona depot we obtained several quotations.

Intervid was selected as the products and service they offered stood out above the rest. We have received personal and efficient service from day one.

The CCTV installation was completed neatly and has met our requirements thus far.
